Platform

Introducing

The Global Matchmaking Platform

For industrial decarbonization

Global
Matchmaking
Platform

Global Matchmaking Platform (GMP)

Key facts

- Launched at COP29
- Facility of the Climate Club
- Secretariat hosted by UNIDO

- A service open to **all emerging markets and developing economies (EMDEs)**
- For articulating **industrial decarbonization needs**
- And connecting with relevant **partners for technical and financial assistance**

Global
Matchmaking
Platform

Global

Elevating the theme
of low emissions
industrialization

Matchmaking

Core function of
enabling countries
to be empowered for
their requests

Platform

The place for open
exchange and engagement
for all stakeholders

Global

of low emissions
industrialization

Matchmaking

Core function of
enabling countries
to be empowered for
their requests

Platform

The place for open
exchange and engagement
for all stakeholders

Elevating the theme of industrial decarbonization

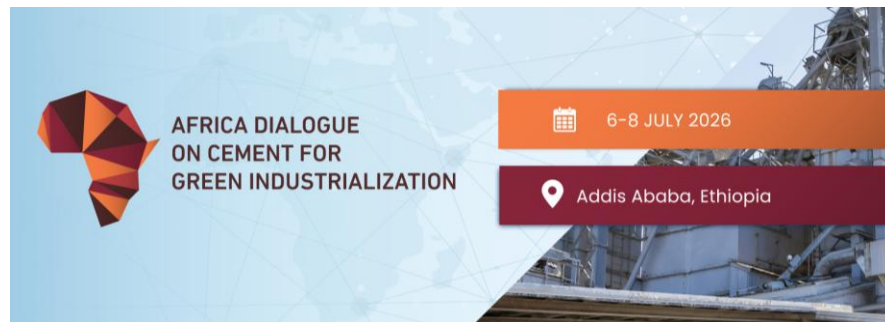

Climate Trade Adjustments - Cairo, Egypt

Low Carbon Steel - Pohang, South Korea

Cement Decarbonization - Santiago, Chile

Cement for Green Industrialization
 Addis Ababa, Ethiopia

Global
Matchmaking

of low emissions
industrialization

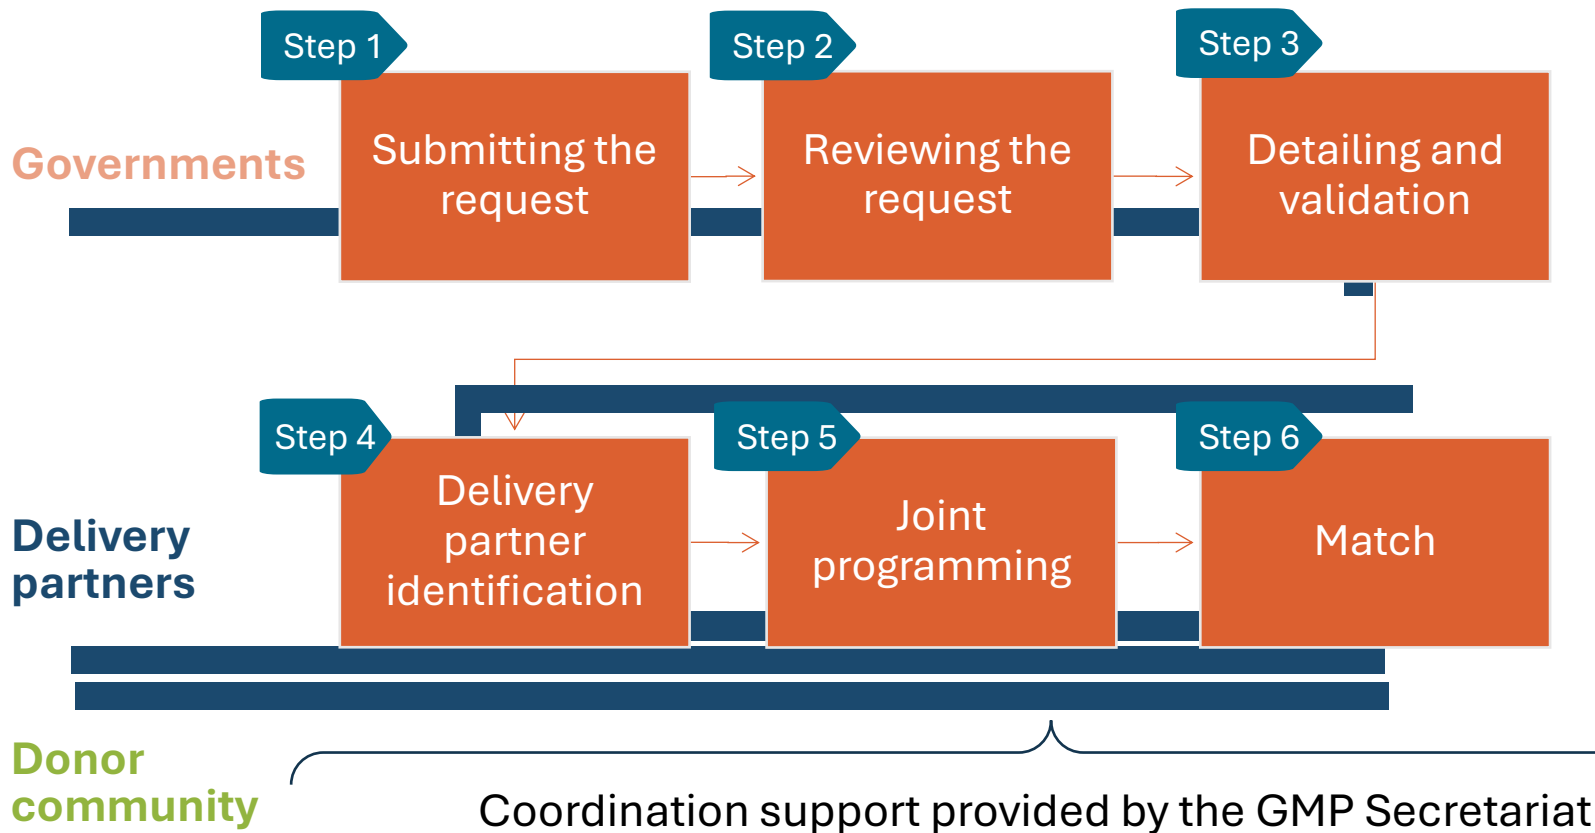

Matchmaking

Core function of
enabling countries
to be empowered for
their requests

Platform

The place for open
exchange and engagement
for all stakeholders

How it works

Status of the matchmaking process

Ongoing outreach to new countries

Bangladesh, Bolivia, Brazil, Costa Rica, Ecuador, Ethiopia, Ghana, India, Kazakhstan, Kyrgyzstan, Madagascar, Malaysia, Mexico, Mongolia, Mozambique, Nigeria, Pakistan, Republic of Congo, Rwanda, Senegal, South Africa, Thailand, Ukraine, Uruguay, Uzbekistan, Viet Nam.

Diverse types of requests

NDC
Enhancement

Support for
integrating and
enhancing industry
mitigation in NDCs

Transparency
and MRVs

Assistance with MRV frameworks
and Biennial Transparency Reports

Sector specific
decarbonization

Cement and steel,
roadmaps, programs,
pilot projects – next,
textile, bricks,
petrochem.

Support with complying
with carbon border
policies

Carbon
leakage

Financial
support

Support for
establishing funding
mechanisms –
trusted partners

of low emissions
industrialization

Matchmaking

Core function of
enabling countries
to be empowered for
their requests

Platform

The place for open
exchange and engagement
for all stakeholders

Global
Matchmaking
Platform

Establishing a network of partners

Multilateral

NET ZERO
PARTNERSHIP

Bilateral

Global collaborative initiatives and think tanks

Associations

Philanthropies*

Climate funds

* Coordinating on activities

By sharing knowledge and insights from the GMP Network

The cover features a large background image of an industrial facility, possibly a refinery or chemical plant, with tall distillation columns and large storage tanks, set against a sunset sky. At the top, logos for UNIDO (United Nations Industrial Development Organization), Climate Club, Global Matchmaking Platform, NET ZERO PARTNERSHIP, and UNDP are displayed. The title 'From Ambition to Action: How Countries Are Advancing Industry in their NDCs' is prominently displayed in white text on a blue gradient background. Below the title, it states 'A joint UNIDO–UNDP explainer on industrial decarbonization in the 2025 NDC cycle'. At the bottom, it lists the supporting organizations: UN Women, UN Women Africa and Gender Action, IKI (International Knowledge for Industry), and UN Women Africa and Gender Action.

Cement sector decarbonization in Latin America

Costa Rica

Colombia

Waste-derived cement plants

Peru

Cement sector decarbonization

Chile

*Waste streams for
alternative fuels in cement kilns*

Argentina

Cement Decarbonization Roadmap

Global
Matchmaking
Platform

Industrial Decarbonization *beyond* the Cement Sector in Latin America

Costa Rica

Cement sector decarbonization

- + National decarbonization strategies

Peru

Cement sector decarbonization

- + National decarbonization strategies
- + Brick sector decarbonization

Chile

Waste streams for

alternative fuels in cement kilns

- + GHG reductions from co-processing
- + End-of-life tires and high calorific waste use

Colombia 

Waste-derived cement plants

- + NDC enhancement
- + Regulations and policies for ID
- + Brick sector decarbonization

Argentina 

Cement Decarbonization Roadmap

- + NDC enhancement
- + MRV systems
- + Incentives for heavy industry
